“The World in SECONDS”
 mmVISION iMessages™:
 Instant Multimedia Postcards

“Mobile-Eye on the World™”
 mmVISION iView™ Software:
 Live-Video & Instant-TelePhotos
 to others miles away

Introducing MediaMotion/mmVISION’s powerful mmCOMM software suite:

Breakthrough 2G/2.5G/3G/802.11 W-LAN mobile multimedia ‘killer’ applications for law enforcement, health care, security, disaster relief, insurance, real estate, transportation, energy, construction, travel, news media, consumers, etc.

□ **As a Digital Still Picture Camera**

iPictures™ captures many THOUSANDS of VGA (640x480 pixels) Talking-Pictures™ (compared to hundreds of other’s image-with-NO-Audio of non-HP cameras because of inability to do wavelet video compression) using leading-edge, high-quality and high-ratio wavelet image compression.

iMessages™ allows you to capture photos and edit high-quality multimedia postcard™ or slide-shows (VGA-size pictures, audio, text, and color hand-drawings) in small files, that you can send in seconds to others real-time via cell-phone (“The World in SECONDS™”).

□ **As a Digital Video Camcorder**

iVideo™ captures hour(s) of video (compared to SECONDS of others’ video capture of non-HP cameras because of inability to do wavelet compression) using advanced motion-wavelet video compression (convertible to AVI format), allowing simultaneous capture and compression of audio/video scenes into a removable CF storage card.

□ **As a “Mobile-Eye On the World™”**

*The First and Only
 in the World!*

iView™ One-Way Live Video --- between mobile iPAQ/Jornada Pocket PC (with a HP Pocket Camera and a cell-phone), and a Windows PC.

InstantTelePhoto™: (1) Viewing PC user can capture in SECONDS high quality VGA remote-telephotos (of anything he sees) in the live-video (from iPAQ/Jornada). (2) Pocket PC user can send in SECONDS HP-Pocket-Camera-captured VGA-size pictures (*literally from his palm*) wirelessly (to Viewing PC).

Introducing mmVISION mmCOMM™ Software

*The First and Only
in the World!*

"The World in SECONDS"
mmVISION iMessages™:
Instant Multimedia Postcards

Your mmVISION iMessages™ software allows you to capture photos ("A Picture is a Thousand Words?"), edit them into **multimedia VGA (640x480) postcards** and **send** them **real-time to others in SECONDS**, using mobile phone (GSM/CDMA/GPRS/2G/2.5G/3G / 802.11 WLAN). Your HP Jornada or iPAQ Pocket PC equipped with a HP Pocket Camera, and wireless phone at any location can be conveniently connected to the remote PC viewer *either* through simple point-to-point direct dialing *or* the Internet.

iMessages™ Software (v.1.0)

- **Multimedia Postcard / Slide-Show Editor:** Allows you to add voice, music-audio, hand-writing, and text-caption to your iPictures™- or iView™- captured images, and convert them into multimedia postcards or slide-shows, and send them real-time wirelessly to others in SECONDS (or email or stream over the Internet) !
- **Two Ways to Connect:** (1) Point-to-Point Direct Dialing Mode. (2) Internet Mode.
- **Various Telecom Networks:** GSM / CDMA, satellite, CDPD, GPRS, 3G, 802.11 W-LAN, or POTS line.

Optional: Special Telecom: Low-Cost Packetized Digital Short-wave Radio, or Satellite Phone.

Mobile Multimedia Communication
--- Anytime, Anywhere, Anyhow™!

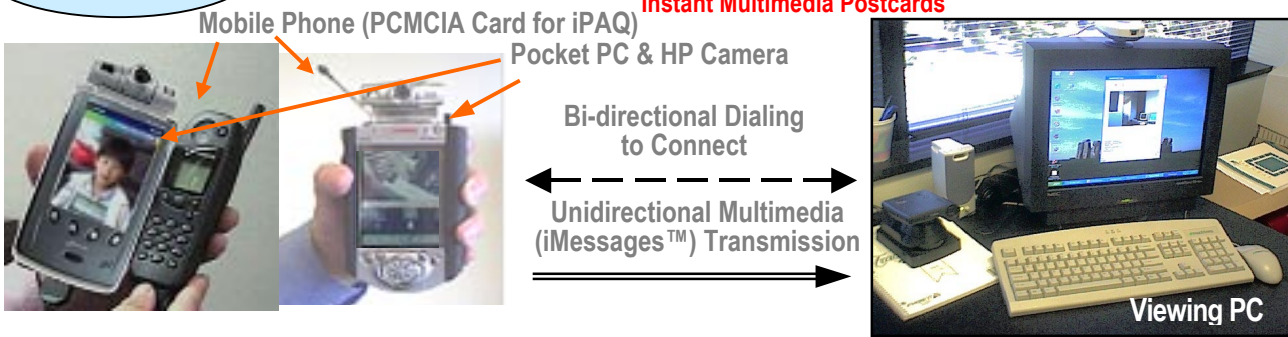

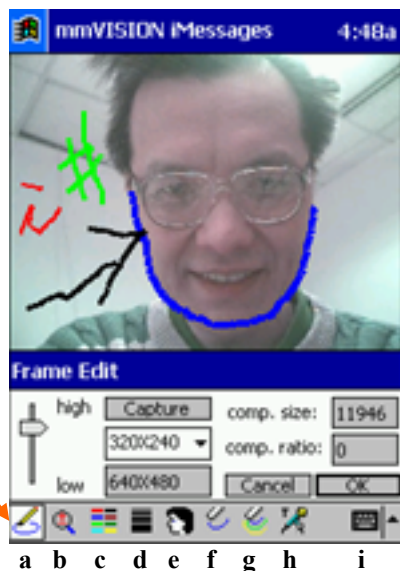

Illustration of iMessages™ Software Feature: Multimedia Postcard / Slide-Show Editor - on Pocket PC

To illustrate iMessages adding audio, hand-writing, and text-caption to your iPictures-captured images, and making multimedia slideshow, the following are extracted text and screens from iMessages Quick User Guide:

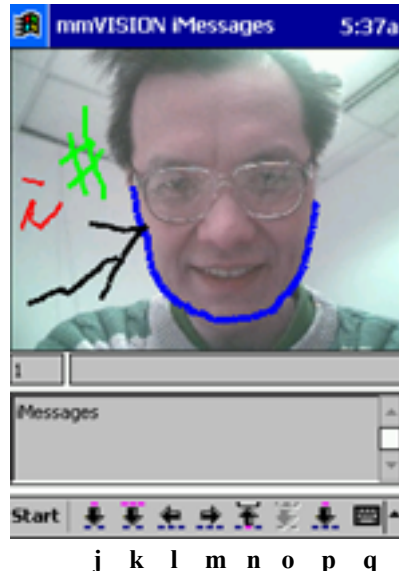

Icon bar:

- (a) Draw
- (b) Zoom
- (c) Color for draw
- (d) Draw width
- (e) Load image
- (f) Erase last draw
- (g) Erase all draws
- (h) Add audio and text
- (i) Keyboard

Icon bar:

- (j) insert one frame
- (k) insert mmv file
- (l) previous frame
- (m) next frame
- (n) cut . . this frame
- (o) paste frame
- (p) update current frame
- (q) Keyboard

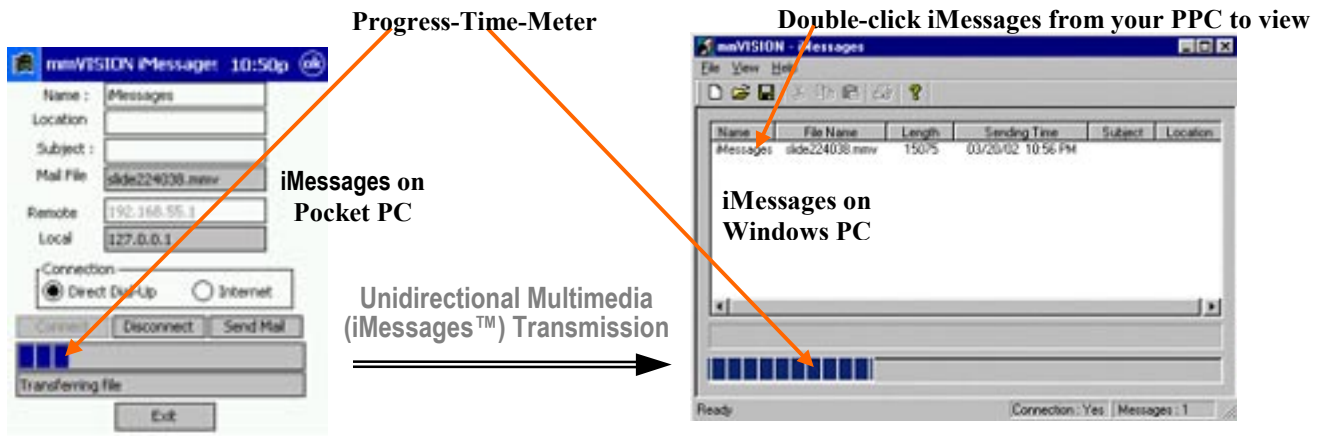

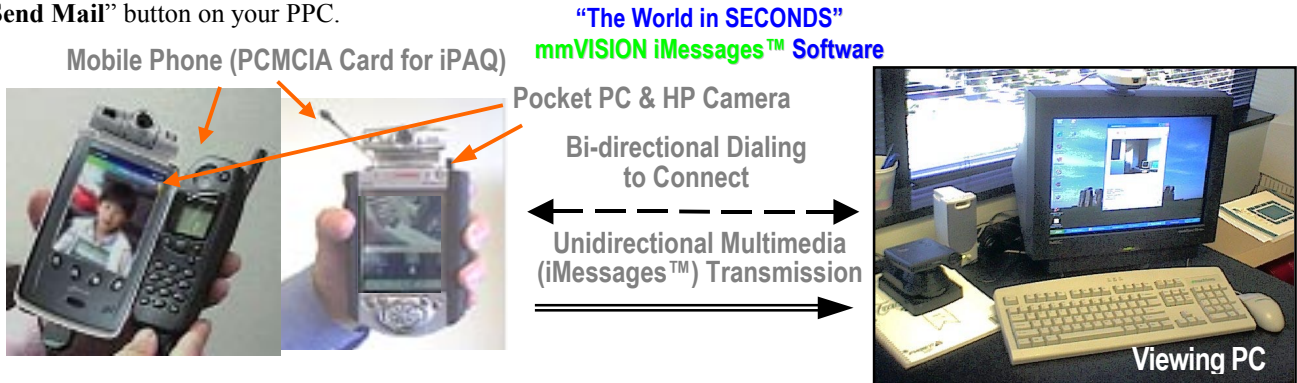

Illus. For (14): Repeat Steps (1)-(13) to add more multimedia postcards, or to edit them.

(14) CONGRATULATIONS ! You have created your first Multimedia Postcard iMessages ! You may repeat steps (1)-(13) to add more multimedia postcard(s)/slideshow, or to edit them.

Illustration of iMessages™ Software Feature: Real-Time Multimedia Postcard (from Pocket PC to Windows PC):
 To illustrate iMessages sending your multimedia postcards to your colleagues, family members, or others real-time in **SECONDS**, the following are extracted text and screens from iPictures Quick User Guide:

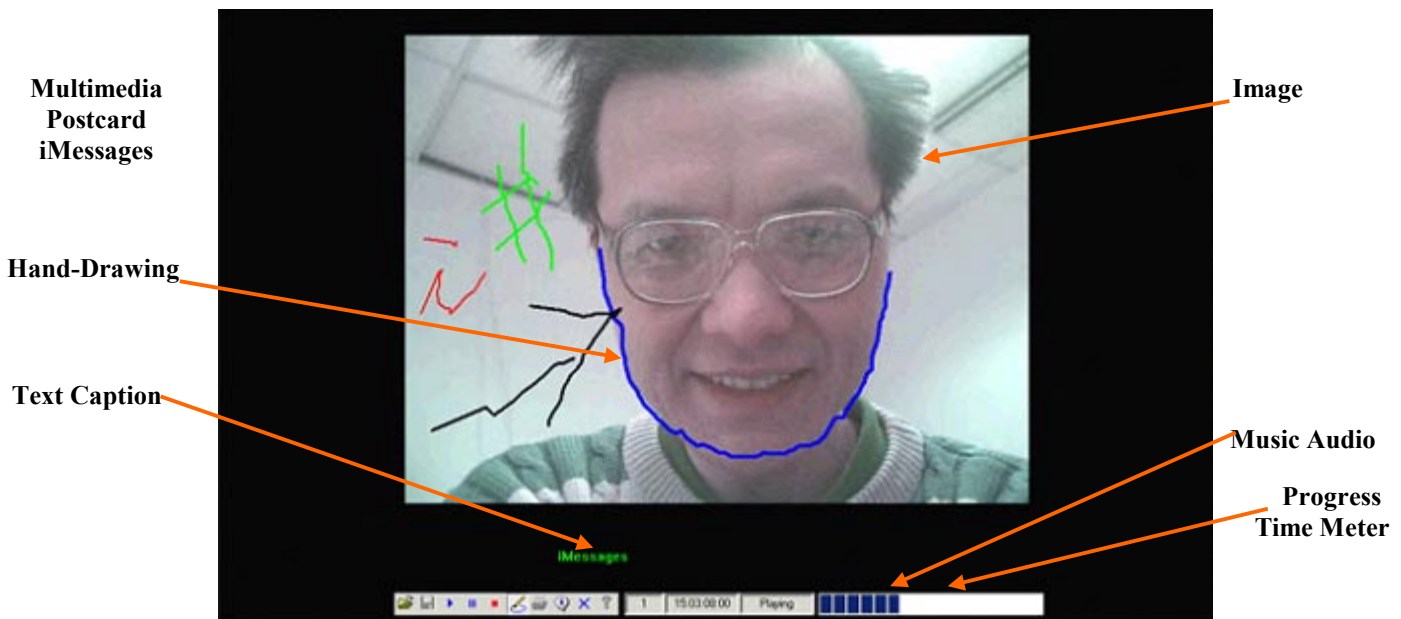

(3) To send your (Multimedia Postcard) iMessages to your Windows PC viewer real-time wirelessly in SECONDS, please click the "Send Mail" button on your PPC.

Illus. for (3): Click "Send Mail" button on Pocket PC.

Illus. for (6): Click newly-arrived iMessages file.

(6) Your iMessages Windows PC viewer may then double-click the newly arrived iMessages file to view and **HEAR** your Multimedia Postcard (sent to him real-time and wirelessly in SECONDS)! Please note the actual VGA image is **FOUR** times the size below.

Illus. for (6): Click to view the 640x480 VGA Multimedia Postcard iMessages. Please note the actual VGA image is **FOUR times the above size.**

Introducing mmVISION iMessages™ Software

*The First and Only
in the World!*

“The World in SECONDS”
mmVISION iMessages™:
Instant Multimedia Postcards

mmVISION iMessages™ use leading-edge proprietary real-time high-quality, high-compression-ratio Wavelet image and video compression technology which result in small file sizes. The current version is specially optimized for Jornada and iPAQ Pocket PCs for enhanced performance.

iMessages™ Software (v.1.0)

- **Multimedia Postcard / Slide-Show Editor:** Allows you to add voice, music-audio, hand-writing, and text-caption to your iPictures™- or iView™- captured images, and convert them into multimedia postcards or slide-shows, and send them real-time wirelessly to others in **SECONDS** (or email or stream over the Internet) !
 - **Two Ways to Connect:** (1) Point-to-Point Direct Dialing Mode ---- Recommended and results in better performance due to higher data rates. (2) Internet Mode ---- Lower cost for long-distance usage, but could have lower performance due to longer Internet delays.
 - **Various Telecom Networks:** GSM / CDMA, satellite, CDPD, GPRS, 3G, 802.11 W-LAN, or POTS line.
- Optional: Special Telecom:** Low-Cost Packetized Digital Short-wave Radio, or Satellite Phone.

HP-Compaq Jornada & iPAQ Pocket PC and Windows PC System Requirements

iMessages Windows PC:

- (1) Processor Type: Intel Pentium 200 MHz or higher performance CPU for Windows PC.
- (2) RAM: 32 Mbytes (minimum) recommended.
- (3) Operating System: Windows 95/98/98SE/2000/Me/XP on PC.
- (4) Modem Connection: Regular dial-up modem (e.g. 56 kilo-baud) on Windows PC.
- (5) Various Telecom Networks: POTS lines, etc.
- (6) Point-to-Point Direct-Dial iMessages connection (PPC to Windows PC) is recommended, using Microsoft Windows 95/98/98SE/Me Dialup-Server, or if your iMessages PC uses Windows 2000/XP, you will need to setup your iMessages Windows PC's Microsoft Dialup Networking (“Make incoming network connection” feature). Please refer to above for details.

iMessages Pocket PC:

- (1) Processor Type: Intel StrongArm 206 MHz CPU on HP Jornada 56X family, or Compaq iPAQ Pocket PC 36XX / 37XX / 38XX Pocket PC
- (2) RAM: 32 Mbytes (minimum) recommended.
- (3) Operating System: Windows CE 3.0 Pocket PC 2000 or Pocket PC 2002 on Pocket PC
- (4) The following is a PARTIAL list of TESTED telecom devices that are compatible with Pocket PC & mmVISION iMessages application:
 - Mobile Phone PCMCIA card: Nokia CardPhone 2.0 (GSM 900/1800) (Need custom CF extender to jack-up HP camera)
 - Sierra Wireless Aircard 510 (CDMA)
 - Sierra Wireless Aircard 555 (3G)
 - CF BlueTooth Card: Symbol BlueTooth Card Wireless Networker
 - BlueTooth Mobile Phone: Ericsson T39 (Tri-band GSM)
 - Mobile Phones:
 - Nokia 51XX/61XX (900/1800/1900)
 - Motorola L2000 (Tri-band)
 - Qualcomm QCP-1960 (CDMA)
 - 802.11 W-LAN:
 - Compaq WL110 Wireless PC Card (Need custom CF extender), WL310 Home Office Gateway
 - Symbol Wireless Networker (Need custom CF extender to jack-up HP camera above antennae)
- (5) Various Mobile Telecom Networks: GSM, CDMA, satellite, CDPD, GPRS, 3G network, or POTS lines.
- (6) Point-to-Point Direct-Dial iMessages connection (PPC to Windows PC) is recommended.
- (7) A compatible camera is required, e.g. HP Pocket Camera (F1869A) available worldwide.
