

Your mmVISION pcVUguard™ from MediaMotion / mmVISION allows you to turn your two Windows PCs (one with PC camera) into a **powerful digital remote surveillance system**.

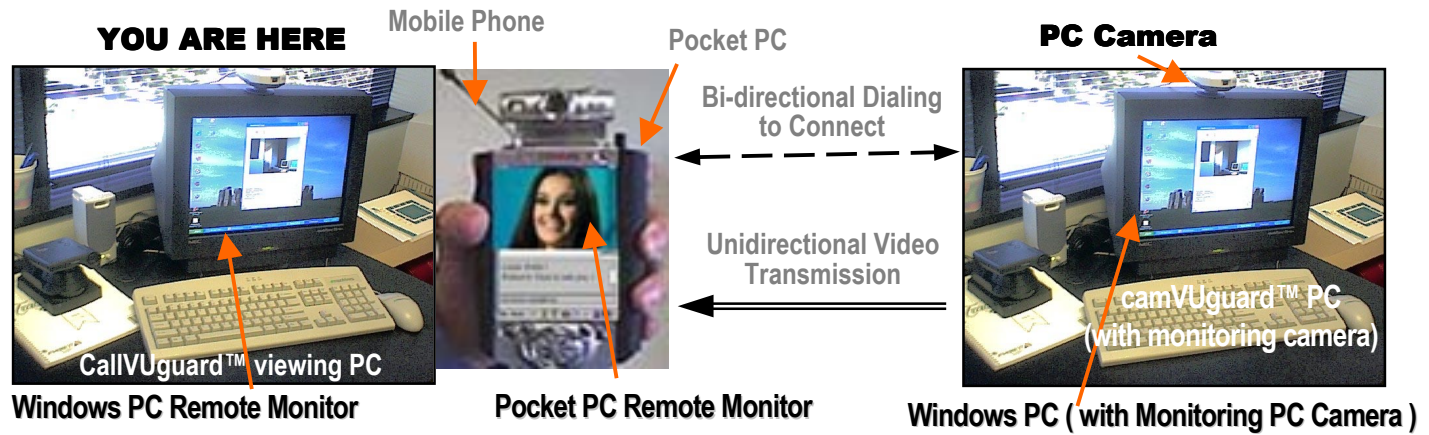

**pcVUguard™ (Version 1.0)** has three modules – AutoAlertVUguard, camVUguard, and CallVUguard:

- as Windows PC (AutoAlertVUguard) motion-detection security monitor, will:
  - (i) capture PC motion-detection-video,
  - (ii) sound PC motion-detection audio alarm,
  - (iii) place motion-detection call to your phone, and
  - (iv) send email alert to your email address.
- as Windows PC (CallVUguard) remote monitor, and capture 640x480 WYSIWYG InstantTelePhoto.

mmVISION pcVUguard™ uses leading-edge proprietary real-time high-quality, high-compression-ratio wavelet image and video compression technology which result in small file sizes. The current version is specially optimized for the Pocket PCs for enhanced performance.

pcVUguard™ supports truly *anytime, anywhere, anyhow* operation. They are highly cost-effective *killer applications* that would meet your mobile security needs as a consumer, a professional, or in your business:

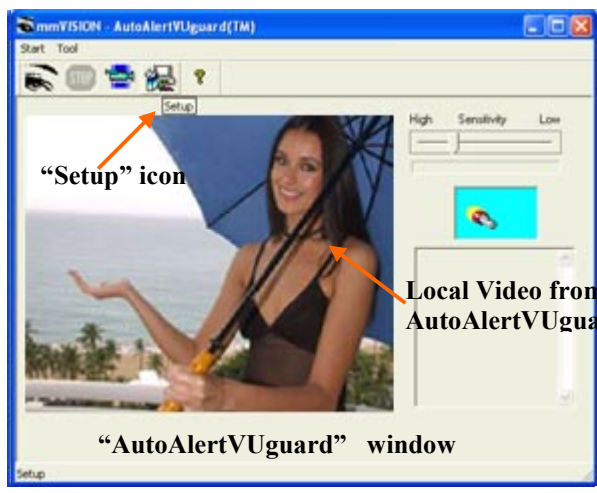

1. especially in surveillance, monitoring, and security control; and
2. in industries as diverse as law enforcement, security, real estate, insurance, construction, etc.

that can be added by  
your viewer:  
“InstantTelePhoto”

InstantTelePhoto™  
from your Windows  
PC camera miles away

Actual VGA (640x480)  
Captured Video is 4  
times this size.

Illus. for (9): Double-click local “Im\_R\_0.mmi” image to view InstantTelePhoto.

# Support of HP Pocket Camera (F1869A) on iPAQ Pocket PC from NEW HP

## Introducing mmVISION mmCOMM™ Software

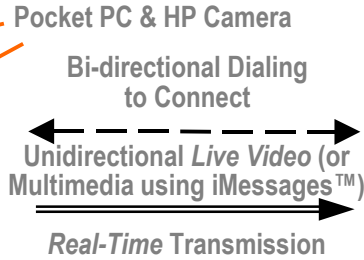

mmVISION iPictures & iVideo:  
Talking-Picture™ Video Camera  
mmVISION iVUguard:  
640x480 Security Camcorder

*The First and Only  
in the World!*

“The World in SECONDS”  
mmVISION iMessages™:  
Instant Multimedia Postcards

“Mobile-Eye on the World™”  
mmVISION iView™ Software:  
Live-Video & Instant-TelePhotos  
to others miles away

mmVISION pcVUguard™:  
Remote Surveillance System

Introducing MediaMotion/mmVISION’s powerful mmCOMM software suite:

Breakthrough 2G/2.5G/3G/802.11 W-LAN mobile multimedia ‘killer’ applications for law enforcement, security, insurance, real estate, construction, consumers, etc.

### □ As a Digital Still Picture Camera

iPictures™ captures many THOUSANDS of VGA (640x480 pixels) Talking-Pictures™ (compared to hundreds of other’s image-with-NO-Audio of non-HP cameras because of inability to do wavelet video compression) using leading-edge, high-quality and high-ratio wavelet image compression.

iMessages™ allows you to capture photos and edit high-quality multimedia postcard™ or slide-shows (VGA-size pictures, audio, text, and color hand-drawings) in small files, that you can send in seconds to others real-time via cell-phone (“The World in SECONDS™”).

### □ As a Digital Video Camcorder

*The First and Only  
in the World!*

iVideo™ captures HOURLY of video (compared to SECONDS of others’ video capture of non-HP cameras because of inability to do wavelet compression) using advanced motion-wavelet video compression (convertible to AVI format), allowing simultaneous capture and compression of audio/video scenes into a removable CF storage card.

iVUguard™ captures HOURS of VGA-size (640x480) silent-video (compared to SECONDS of others’ up-to QVGA (320x240) video capture of non-HP cameras because of inability to do wavelet compression) using advanced motion-wavelet video compression (convertible to AVI format), allowing capture into CF storage card.

*The First and Only  
in the World!*

### □ As a “Mobile-Eye On the World™”

*The First and Only  
in the World!*

iView™ One-Way Live Video -- between iPAQ (with HP Camera & a cell-phone), and a WinPC. InstantTelePhoto™: (1) Viewing PC user captures in SECONDS high quality VGA mobile-telephotos. (2) iPAQ user sends in SECONDS HP-Camera-captured VGA pictures wirelessly (to Viewing PC).

pcVUguard™ Remote Surveillance System (Requires 2 Windows PC, one with PC camera):  
As Windows PC (AutoAlertVUguard) motion-detection security monitor, will:  
(i) capture PC motion-detection-video, (ii) sound PC motion-detection audio alarm, (iii) place motion-detection call to your phone, and (iv) send email.  
As Windows PC (CallVUguard) remote monitor, and capture 640x480 InstantTelePhoto.  
Coming Soon: as Pocket PC mobile monitor, & capture 640x480 InstantTelePhoto.

**Mobile Multimedia Communication --- Anytime, Anywhere, Anyhow™!**
